

# RIKEN-JSPS-CAS SYMPOSIUM

**Date:** Friday, Dec.2, 2016

**Venue:** Room S507,  
Chemistry and Materials Physics Bldg.

- 13:00-13:30 **Dr. Hongli MAO**  
Nano Medical Engineering, RIKEN  
“Growth factor immobilization on biological surfaces for improved cell culture”
- 13:30-14:00 **Dr. Jing Huang**  
College of Chemistry, Jilin University  
“Micro/nano-particles of gadolinium compound for MR imaging and osteogenic inducing”
- 14:00-14:30 **Dr. Seiichi Tada**  
Emergent Bioengineering Materials Research Team, CEMS, RIKEN  
“Development of functional peptides with evolutionary molecular engineering”
- 14:30-14:50 Break
- 14:50-15:30 **Prof. Qigang Wang**  
School of Chemical Science and Engineering, Tongji University  
“The mild preparation and biological application of hierarchical structure hydrogels”
- 15:30-16:10 **Prof. Peibiao Zhang**  
Changchun Institute of Applied Chemistry, Chinese Academy of Sciences  
“Polypeptide modified nanocomposite microcarriers for bone tissue engineering”
